10 Long and straight. Water on right is located 240 yards from tee box #2. Approach shot with a long iron to a shallow green.

11 Long and straight. Be aware of water on right side of green. Putting green slopes toward the fairway.

12 Tee shot should be straight or to the right. Green is shallow and demands a soft approach shot.

13 Short par 3. Swirling winds can alter your club selection considerably.

14 Trees on the left can catch your drive. Second shot is uphill to a sloping green.

15 Dogleg to the left. A straight tee shot should only be played 230 yards. Second shot requires a short to mid iron approach to a well-protected green.

16 Plays into the prevailing wind. Green is large and sloping toward you.

17 Long par 5. Good three shot hole. Water to the right of the green catches many balls.

18 Excellent finishing hole. Drive should be slightly to the left. Green is protected by water on the left and right. Check wind direction carefully.
